

Pioche Weekly Record

THURSDAY, JULY 13, 1893.

Arrival and Departure of Mails

PIOCHE AND MILFORD.
Arrives daily, except Monday, at 6:30 p. m.
Departs daily, except Sunday, at 8:30 p. m.
PIOCHE AND ELY.
Arrives Tuesday and Saturday, at 6:45 p. m.
Departs Tuesday and Saturday, at 8:00 a. m.
PIOCHE AND HELENE.
Arrives Tuesday and Saturday, at 6:00 p. m.
Departs Monday and Friday at 8:00 a. m.
PIOCHE AND HIKO.
Arrives Tuesday and Friday at 6:00 p. m.
Departs Saturday and Wednesday, at 10:00 a. m.

POSTOFFICE HOURS.

8 A. M. to 7 P. M.
SUNDAYS,
6 P. M. to 7 P. M.
No money orders issued or letters registered after 6:30 p. m. and none on Sundays.
JOHN SMITH, P. M.

LOCAL INTELLIGENCE.

Frosted fancy drinks at the Palace.
Foster predicts a heavy wind storm on the 18th.
For fine family liquors, call at the Palace.

The adjusters of the insurance companies having policies in the Bullionville Reduction Works are expected to arrive from Salt Lake this evening.
If you want a dozen bottles of assorted Soda or Sarsaparilla at \$2.50, call at Thompson's.

The closing down of the mines here was a bad thing for the freighters, but the burning down of the Bullionville Reduction Works filled their cup of woe to overflowing.

Alex. Thompson has just received a carload of Salt Lake Bottled Beer, Soda and Sarsaparilla, which he is rapidly disposing of.

Schuman, the photographer, is now ready to take photographs in the highest style of the art at his tent on Meadow Valley street. His stay will be short.
For a fine cigar call on Sam E. Wertheimer.

Dandruff forms when the glands of the skin are weakened, and if neglected, baldness is sure to follow. Hall's Hair Renewer is the best preventive.

Step in and keep cool at the Palace.
Monday was rather blustery and disagreeable. It was hoped the storm would bring some rain, but the only clouds appearing were clouds of dust.

Mining Location Notices for sale at this office.

County Commissioner Schaefer was up from Helene last Sunday. He thinks Ferguson district is the only metal-bearing and now that gold is the only metal of value the seekers after wealth will be attracted to this gold field, one of the greatest in the country.

The house of S. E. Wertheimer has secured the exclusive handling for this section, of the celebrated McBryer whiskey.

Dr. Campbell went to Eagle Valley Sunday to attend the child of John Hammond, who was suffering from the quinsy. He prescribed for the sufferer and has since learned that the child is all right.

The celebrated McBryer whiskey is the finest in the world. Families supplied. S. E. Wertheimer has the sole handling of this famous whiskey.

"Be sure you get Ayer's" is an important caution to all in search of a thoroughly reliable blood-purifier. Ayer's Sarsaparilla being the one on which there can be no manner of doubt. It has stood the test of nearly half a century, and has never been considered the standard.

Fancy ice cold drinks at the Palace.

George A. Meera, the well-known mining operator of Salt Lake City, committed suicide last Saturday. Pecuniary difficulties led to the rash act.

The only cold air refrigerator in town is at Wertheimer's sample rooms and all liquors are correspondingly cold.

Joe Matt, a well known miner in this section, departed Saturday for Salmon City, Idaho.

Salt Lake Beer at Thompson's, at the low price of \$2.50 for a dozen bottles.

August Werner will sell his entire household furniture on Saturday, July 27th, having decided to leave Pioche. The furniture is in fine condition and a rare chance will be afforded housekeepers to purchase articles at their own price.

The finest bar liquors in the country are dispensed over the Palace bar.

The Chicago Ledger and the Chicago Blade are two of the greatest story papers published. Judging by their immense circulation, they must be taken by nearly every family in the country. They only cost a nickel a copy or a dollar for six months.

Alex. Thompson is providing for the wants of the people of Pioche during the warm weather, having just received a carload of Salt Lake Beer, Soda and Sarsaparilla, which he is disposing of at \$2.50 for a dozen bottles.

The Union Pacific has suspended its daily service between Juab and Milford, on account of dull business. Hereafter the train between those points will run tri-weekly. This action of the railroad deprives Pioche of its daily mail, which

will now arrive Tuesdays, Thursdays and Saturdays.

The Palace is the coolest and pleasantest resort in town.

The World's Fair rate on the railroads is now one fare for the round trip.

Mrs. John Molloy and daughter of Bristol were visiting in town yesterday.

The April Fool and Magnolia mines at Ferguson are now employing only three men each.

The Nevada Southern Railroad has opened for traffic, from Blake on the A. & P. to Vanderbilt.

A boiler pump was last Monday taken from the old quartz mill at Bristol, for use in the saw mill near Helela.

Salt Lake City is having a suicide epidemic. Hardly a day passes but what some unfortunate takes his own life.

JOB PRINTING in all its branches, equal in style to any, done at this office.

When you see a rattlesnake with ten rattles and a button, you touch the button and the snake will do the rest.—Texas Sittings.

John F. Cassell, who was interested in the mines of Pioche and other sections in the early days, died in San Francisco on the 1st inst.

D. A. Reeves and his cousin, W. Bailey, came in on Monday evening's Milford stage, and departed this morning for Helela.

Mark McKimmins, who lived in Virginia City and Austin in the early days, but who has resided in Utah for the past twenty years, died in Salt Lake City last Sunday.

The infant child of Wm. Wheatley died at Silver King yesterday and the remains were brought to town this morning. The funeral will take place tomorrow morning at 10 o'clock.

The Ogden Standard says that Hank Vaughan, a desperado who was a holy terror in eastern Nevada twelve or fifteen years ago, passed in his checks a few days ago at Pendleton, Oregon.

The board of school examiners have concluded their labors. They awarded only one teacher's certificate, Miss Drene Gant of Las Vegas passing the rigid examination laid down by the State Board.

At Cripple Creek and in some of the other mining camps of Colorado flags were at half mast on the 4th, as an expression of the inhabitants over the surrender of America to the British money kings.

Jack Wheatley was in town this week from Silver King district. The furnace in which he and his brothers are interested is not completed, and the condition of the silver market is such that it is doubtful if anything more will be done towards the erection of the works this season.

August Werner has received assays from California of some ore samples from the Clementina mine at Goode Springs. One of the veins is six feet wide and the assay shows 44 ounces gold; another vein 25 inches wide shows 224 ounces gold. Naturally Mr. Werner feels elated at these returns.

El. Freudenthal departed yesterday morning with a load of supplies for his mines in Comet district. He is so confident that silver will be restored in a short time to its full value that he told some of his friends he did not intend to come back to Pioche until the price of the white metal did raise.

The Populists of Denver celebrated the Fourth with a grand parade. Speeches condemnatory of the gold conspirators were enthusiastically received. One of the speakers said that a revolution is at hand; that 63,000,000 people will not submit to be robbed by 23,000, the number who own and control one-half of the wealth.

A special to the Tribune says the Commercial National Bank of Ogden closed its doors temporarily Saturday morning, on account of the defalcation of the cashier, Oscar E. Hill, who has falsified the books of the bank and thereby deceived the directors. The defalcation is supposed to be about \$75,000, and the falsification has been going on about five years.

"The Irrigation Market" is the name of a new monthly journal just issued in New York City, the first number of which has reached this office. As its name indicates, it is devoted to irrigation and the reclamation of arid lands. Richard J. Hinton, late chief of the U. S. Irrigation Inquiry, is editorial director. The subscription price is only \$1.00 per year.

The money sharks of New York are growing fat on the stringency of the money market. Old Shylock Sage loaned last week, of course on gilt-edged security, something over a million dollars at the rate of 73 per cent! And still the snobs talk about contracting the currency. The fool killer is badly needed in America just at present.

People should pay no attention to the quotation of silver now being sent out from New York, because there really is no silver market and the prices given do not bear any relation to the actual value of the bullion. Furthermore, the entire gang on the stock board do not control at present as much silver bullion as the ore would produce dug out of the mines around Pioche in a week.

A fine upright piano for sale at a bargain. Enquire of Mrs. A. Werner, Pioche, Nevada.

PAHRANAGAT VALLEY.

An Interesting Budget of Items from this Beautiful Part of our County.

Correspondence of THE RECORD.

Hiko, Nev., July 7, 1893.

Once more I halt in the Valley of Pahranagat and say "Hello!" whilst rusticiating in the shades of tented groves of Hiko, and while enjoying such luxuries as the pencil across the snowy white paper, hoping to charm the critical readers of THE RECORD somehow.

Under such circumstances should I be dithought in a word figure of chaotic abstruseness the charitable reader will excuse a prospector whose intentions are really good. Indeed the sun has never shone brighter than to-day through the transparent silvery skies of Southern Nevada. All nature seems warm; even the affectionate citizens of this oasis in the desert, as they bask in shades, seem warmer, while the thermometer rests at only 104°!

My attention has been called recently to an article in "The Lode," written by "One that was jilted," of date 24th ult., and we note with satisfaction one of Pioche's mappers in his periodical revelries hugging in public the lady from the Muddy and the lady from the Sainly City. His iniquity has aroused that loathsome monster from its quiet grave and has created a new conspiracy of lowness from a rotten rib, and after breathing new life through his putrid nostrils on its travels from the social tree, we shall shake the giant monster, whose name is Scandal. However, in the words of scripture we reproduce the old saying, "God forgive them, they know not what they do;" "Let man who is without sin cast the first stone." Sympathetically I will say that the best hearts that ever throbbed are sometimes discordant in their breathings. With lofty purposes, the purest refinement, the noblest minds that have ever glowed with ennobling sentiment may sometimes harbor in secret recesses thoughts and intentions that would not be to the credit of the best conditions of the human character. The purest lips on which words ever trembled may perhaps in thoughtless moments give utterance to sentiments which are not beautiful or elevating. Remembering at all times that there may be many a bright aspiration, many a passionate thought, many a calm, stern, bitter heartache concealed behind a polished brow or a smiling lip, let us all be as "playful as kittens," yet harmless.

The 4th was celebrated in a royal manner in Hiko. The citizens here believe in keeping fresh in the minds of the rising generation the downfall of tyranny. The farmers are all busy haying and irrigating, with some harvesting.

Mr. and Mrs. John Richards, accompanied by Miss Helen Sharp, have gone to the county seat on business and pleasure. Young Richards is one of our thrifty agriculturists and stockmen.

Two hearts will be long palpitate as one beneath the handsome frescoed wall of a palatial residence at Hiko. Mr. John E. Ferguson, it is said, will be one of the principal actors. Congratulations, John, I hope will soon be in order.

Wm. Cook and family, who have resided in the Muddy River Valley for several years, passed through Hiko recently, bound for Oregon. Miss Lena Carl accompanies them. She will meet her betrothed at Carson. We predict a wedding there, after which the young couple will go to Tucuman to live.

Chas. Lampton has purchased a farm and formed a co-partnership with the genial Joseph Sharp and they propose to farm on a liberal scale and raise fine stock. The blinding of the business qualities of Joe and Charley, the former a stock raiser and the latter a farmer, will make success certain.

John E. Ferguson has had his new residence recently papered and furnished. The lace curtains are gracefully hanging in the front bay window. To-day John E. has the finest residence in Lincoln county, the pride of Hiko.

The stockmen of this Valley have sold about 250 head of beef steers this season. All have delivered the cattle and returned except Mr. Geer and son.

Stock cattle are said to be dying very rapidly in this Valley with some unknown disease.

The peach crop is almost a total failure here this year. There will be some early peaches, but the late spring frosts killed all the fall peaches. The apple, pear, plum and plum crop will be good. The early harvest apples are ripe.

Firmer and firmer the idea is engrained in my mind of the glorious possibilities of Southern Nevada, that she will ere long awaken from her stupor slumbers and plant her valleys to horticulture. There is no longer a doubt in my mind as to the profits that can be derived. Every acre is good for \$100 profit annually if rightly handled and properly cultivated.

Last week I saw currant and gooseberry bushes heavily loaded with ripe, delicious fruits. Messrs. Cook, Ferguson and Castle, and the Sharp sisters of Hiko, all agree with me that all kinds of berries do extremely well and are a sure crop, while some of the other delicious fruits sometimes fail.

To any one who contemplates planting peach trees, let me say plant the earliest varieties, as they usually bloom last in the spring, while the late fall peach usually blooms first. The Early Crawford is a fine variety and would do well in this climate. The late bloomer will generally miss the latest frosts.

Chas. Little.

Ayer's pills possess the curative virtues of the best known medicinal plants. These pills are scientifically prepared, are easy to take, and safe for young and old. They are invaluable for regulating the bowels, and for the relief and cure of stomach troubles.

FOR SALE.

A fine upright piano for sale at a bargain. Enquire of Mrs. A. Werner, Pioche, Nevada.

LINCOLN COUNTY

AS IT WAS A MONTH AGO.

Observations of a "Record" Representative in a Trip Through the County.

MORMON COLONIZATION.

The colonization of the southern portion of Lincoln county by the Mormons in the near future seems to be almost a certainty. Parties have been trying to make purchase of tracts of land situated in the Muddy Valley ostensibly for that purpose.

The old settlement of Mesquite, situated about six miles north-west of Bunkerville, and which was abandoned some eight years ago on account of the overflow of the Virgin river and the great trouble experienced with the dam and canal, is about to be re-settled. Some thirty families are expected in there this winter, and an addition of some fifteen or twenty families to Bunkerville is also contemplated; more lands have been taken up lately, a new canal has been dug, to carry more water for irrigation purposes, a grist mill put up and also a cotton gin are among some of the late improvements there. On account of the increased attendance at school there will be another school house built this year.

The Vegas ranch is still the Mecca of the Desert, and the desert traveler always welcomes the sight of it like he would a home.

EL DORADO CANYON.

The Southwestern Mining Company are working about fifty men in the mines and mill. The Teahachup and the Wall Street are the two principal mines on which they are working. The company has just about made a stand-off for the year. It is the intention to do considerable development work this year in the hopes of striking some rich bodies of ore.

The company met with a loss last month in the destruction by fire of the boarding house and blacksmith shop situated at the Wall Street mine.

GOOD SPRINGS.

Good Springs, situated in Yellow Pine Mining District, will undoubtedly be one of the biggest mining camps in the State of Nevada. They have the mines, and what is better, ore of a high grade. The ore of the district is chiefly lead and it is there in exhaustive quantities. The ores in certain portions of the district carry a high percentage of gold and silver and one shipment of twenty-four tons netted \$13,489.70.

Among the most prominent mines in the Keystone, owned by Jones Taylor, S. T. Gothe and S. Blake. The Keystone is a veritable bonanza, and is a gold and silver mine.

The Ruth, May Kirby, and some ten other mines owned by A. G. Campbell, have been worked quite extensively lately. The Ruth and May Kirby are considered the biggest lead and silver mines in the district. They have an immense body and the ore runs from 25 ounces to 75 ounces in silver and 40 to 75 per cent. in lead.

The Clementina, owned by Joe Kealey, S. T. Gothe and August Werner, is another fine property. The mine is a gold one, the ore carrying only about two ounces in silver, no lead, and running from 10 to 30 ounces in gold. The ledge is well defined and crops out for a distance of 300 feet, it being a true fissure vein. There are other veins, and of them situated 300 feet from the Clementina shaft and owned by the same parties, shows an average assay value taken from the croppings, of a width of six feet, of 17-10 ounces in silver and 4-10 ounces in gold.

The above are the most prominent mines in the district. There are about twenty-five prospects at the present time that are being developed, though the district contains many more that have had much work performed.

The Flagstaff, owned by James McGregor, still continues to hold its own. He has put up an armory and works his ore at a handsome profit.

California parties have had prospectors in Groom district for the last two months. Although on a pretense of prospecting, their main object is to find out whether enough water can be obtained to water range stock, as it is one of the best ranges in the country for grass, but there is very little water.

Operations have been carried on in the old Freiberg district the last year by Messrs. Sharp and Reed and they have done very well.

Work is still going on in the following districts on a small scale: Secunder, Crescent, Murphy, Cedar, Pahranagat, Lake, Tom Pahute, Silver King, Bristol, Jack Rabbit, Highland and Comet.

Ely and Ferguson districts, notwithstanding the low price of silver, still continue work.

The general average of all ores produced in the county for the six months ending June 30th, 1893, exceeded that of the same period for 1892 by 50 per cent. the gold ores of Ferguson and Yellow Pine districts causing the increase. The agricultural as well as the grazing

interests have suffered extensively on account of water. There have been no rains for the last year in the northern, east and west portions of the county and none in the southern portion for the past two years; the loss on stock ranging from 20 to 35 per cent. south, and from 10 to 25 in the northern portion.

The hay and grain crop will be 15 per cent. less this year and the vegetables about 10 per cent. The fruit crop will be up to its usual standard.

THE WOOLLY ICE OF THE APPLE.

A Paper of Material Interest to Nevada Farmers.

(Newspaper Bulletin No. 8.)

Diagnosis.—Apple trees infested by woolly bodied lice about the scars of amputated limbs, along the sides of the smaller twigs, and at the axils of leaves; the white flocculent matter easily blown away by the breath disclosing the brown bodies of the lice.

Thus we may identify the insect commonly known throughout the country as the Woolly Aphis. At this season of the year these insects become very numerous. The dry climate of Nevada is exceedingly favorable to their rapid multiplication and longevity. Very early in spring small colonies of these insects may be found in protected places on the trunk and limbs of the apple tree. These colonies have been founded by a few individuals which have survived the winter, protected by the roughness of the bark caused by their own activity the preceding year. As the season advances these colonies become larger. Individuals separate from their companions and establish new colonies, until at this time it is an easy matter to find single branches of an apple tree supporting a vast number of these pests. As the greater number of those to be found at this date are wingless their dissemination would appear to be limited; however, later in the season there appear many individuals provided with wings. Through these the rapidity of dissemination is greatly increased. The injury produced by these insects lies in their strength of numbers. The myriads of them, each industriously withdrawing the tree's sap, serve to reduce the tree's vitality very materially. They seek the tenderest parts and hence growing twigs are dwarfed and old wounds are kept open. A young apple tree before me is furrowed by a deep scar extending a distance of several inches and including the greater part of the circumference. In its struggle for existence barely enough nourishing sap has run the gauntlet of insect foes to supply a few stunted leaves and to increase the length of the twig to some extent. These twigs never fully recover from the effects of such an attack. Their early growth is checked by a reduction of the food supply; but worse than this, their injured bark is unable to carry a normal amount of nourishment ever after.

These insects cannot be eradicated easily, if at all, except within restricted limits; however, they may be kept within the limits of comparatively non-injurious numbers. The use of whitewash and paint applied locally, cases of which have come under the notice of the writer in different parts of Reno, is effective so far as it goes, but it is not sufficiently far reaching. A more effective course is to apply some liquid that will kill the insects by contact, without injury to the tree. Thus it is seen that a true poison is not demanded. Kerosene emulsion, or strong carbolic soap will destroy the insects, and if applied periodically will effectually keep them in check. Repeated application is necessary. In short, these pests must be killed and kept killed. A force pump is absolutely necessary in the application of these remedies. The tree under treatment must be thoroughly wetted and by no other means can this be accomplished.

Illustrated bulletin No. 17 of this station treats of this pest and will be sent to any address upon application.

F. H. HILLMAN.

Agricultural Experiment Station, Reno, Nevada, June 29th, 1893.

NEVADA NOTES.

The Reveille says that Austin now has no physician, the first time in 29 years.

Alexander Fraser, Patrick Daly, Jas. Morris and J. A. Carlson, sailing on Lake Tahoe on the 4th, were drowned by the capsizing of their boat.

The prize fight at Reno on the 31st inst. between Barber and McKenzie resulted in a victory for the former. Articles of agreement have been signed for another fight at either Carson or Reno on Aug. 8.

Adam Dixon, an ex-convict, was killed by Fred Grey at Genoa on the 4th. Grey was in liquor and approached Dixon from behind, shooting him in the left side of the head over the ear. Dixon never spoke and expired in a few moments. The murderer tried to shoot others, snapping his pistol five more times, but the shells did not go off. He was arrested and jailed. It seems like an act of retribution, as Dixon met his death in the same place where he shot one Campbell some years ago, and for which he served ten years in the State Prison at Carson.

Death of an Old Journalist.

Judge Geo. W. Brice, an early settler of Idaho, died in Boise City last Friday of apoplexy. He was among the first to enter the Black Hill of Dakota, and was also an early resident of Leadville and Gunnison, Colo., at all of which places the writer met him. He practiced law, prospected the hills for hidden treasure, and being also a printer, sometimes worked at the case. He tried of following mining excitements and returned to Boise about ten years ago. He was associate editor of the Statesman of that city for a couple of years, and at the time of his death was assistant editor of the Democrat. Besides his editorial work he acted as correspondent of several leading newspapers of the East. He was 55 years of age.

The Board of Pardoners met yesterday at Carson. There are a number of cases to be considered.

NEW TO-DAY.

AUCTION SALE

OR

Elegant Furniture

The complete Household Furniture in the residence of August Werner, on Meadow Valley street, Pioche, will be sold at Public Auction on

Saturday, July 29, '93

Sale to commence at 1 o'clock p. m.

AUGUST WERNER.

Notice to Lien Holders

NOTICE is hereby given that the undersigned, assistants of John Bergant, has commenced an action in the Justice's Court of Pioche To wit: County of Lincoln, State of Nevada, against D. N. Barthol and the Helene Sawmill, said mill is situated about sixteen miles south or southwest of the town of Helene, Lincoln County, State of Nevada, for the sum of One Hundred and Nine Dollars (\$109.00), in favor of plainiff and against said defendants, upon the said Helene Sawmill, situated about sixteen miles south or southwest of the town of Helene, Lincoln County, State of Nevada.

Now, therefore, all persons having, holding, or claiming any lien or claim upon said premises are hereby notified to file and appear before the said Court on the 4th day of August, A. D. 1893, at 10 o'clock a. m. of that day, and then and there exhibit their said claim of lien and the proof thereof.

MARK CHURCH.

PROPOSALS for Wagon Road.

Office of County Clerk, Pioche, Lincoln County, Nevada, July 7, 1893.

In accordance with an order of the Board of Commissioners of Lincoln County, a set of proposals will be received in open session of said Board, Monday, August 7, 1893, for the repair of wagon road from O. H. Carter's ranch extending to Meigs Indian Reservation. Said road is about 14 miles long, and the work to be done is to be graded, widened, and otherwise taken up, and all loose rock on embankments to be thrown aside, so as not to roll into said road. Lower Kan Springs to be cordoned and covered with earth. All work to be done in a satisfactory manner.

The Board reserves the right to reject any or all bids if the public good so require.

J. A. CLARK, Clerk.

LEGAL NOTICE.

DISTRICT COURT SUMMONS (11448)

IN THE DISTRICT COURT OF THE STATE of Nevada, in and for the County of Lincoln: The State of Nevada sends greeting to George Staller.

You are hereby required to appear in an action commenced against you as defendant by Annie Walker as plaintiff, in the District Court of the State of Nevada, Lincoln County, at the town of Pioche, and answer the complaint therein, which is on file with the Clerk of said Court, within ten days after the service on you of this summons (exclusive of the day of service), if served in said County, or twenty days, if served out of said County, but within the time specified by the rules of said Court, or you will be defaulted and judgment rendered against you according to the prayer of said complaint.

The said action is brought to recover judgment and decree of said Court now existing between you and said plaintiff on the ground of your failure to provide for me as a wife and child, and in all other respects as above set forth, and in all other respects as above set forth, and in all other respects as above set forth, and in all other respects as above set forth.

County Clerk and ex-officio Clerk of the District Court of the State of Nevada, Lincoln County.

T. J. OSBORNE,

ATTORNEY-AT-LAW,

Notary Public.

OFFICE IN MASONIC HALL.

MULLETT.

You have all heard of "Mullett Head," and now we want you to learn about "Mullett the Hatter," "Furnisher," "Clothier."

Our establishment is recognized as the most beautiful storehouse, filled with the most complete stock of everything in Men's and Boys' wear, to be found in the West. Our Prices always at the Lowest mark, and on

we make Special Prices and take Extra Care to have our customers pleased with price and selection we make for them.

"DUNLAP." Yes, we are the Utah "Dunlap" agents, and it is well known that a wearer of a "Dunlap" hat has the correct thing.

Try us and you will get what you want.
